Science - Official Site

The Acoustics of the Singing Voice. The voice organ is an instrument consisting of a power supply (the lungs), an oscillator (the vocal folds) and a resonator (the larynx, pharynx and mouth). Singers adjust the resonator in special ways. Clearly there is something quite un usual about the voice of a first class opera singer.

The Acoustics of the Singing Voice

Written by a noted laryngologist and student of voice who devoted much of his career to working with Caruso and other singers, the book proposes a method of voice culture based on well-defined physiological laws. According to Dr. Marafioti, these is only one right way to sing — a method based on the scientific principles of voice culture.

Caruso's Method of Voice Production: The Scientific ...

Scientists have discovered that when a woman is fertile, her voice sounds more seductive to men. And women react more strongly to men with deeper voices. One study in particular found that men who heard a woman's voice could get tingles in their skin. The fact that this can happen based of just the sound of someone's voice is wildly cool.
